Business challenges

Asset Management Challenges Organizations Face

- Manual tracking leads to human errors
- Asset loss, theft, and misplacement
- No real-time asset visibility
- Time-consuming audits and compliance issues
- Poor asset utilization
- High operational and maintenance costs

Audit Failure

Result:
Lack of control,
increased expenses,
and operational inefficiencies.

With Lisys RFID
Asset Tracking
Software you can
CONTROL

Our solution

Lisys RFID & Barcode Asset Tracking Solution

Our solution provides an end-to-end digital platform to track assets accurately using RFID and barcode technologies.

Solution Highlights

- RFID & barcode tagging
- Handheld & fixed reader support
- Mobile applications (Android / iOS)
- Web-based management dashboard
- Cloud or on-premise deployment

RFID Handheld Reader

RFID Tags

Fixed Readers

RFID Printers

You can tag RFID to

IT Assets

Physical furniture

Laptop & Computers

Linens

Equipments

Machineries

Appliances

and many more....

How it works

Simple. Accurate. Reliable.

Assets are tagged with RFID or barcode labels
Readers or mobile devices capture asset movement
Data syncs automatically to the central platform
Real-time asset location is displayed on dashboards
Alerts, reports, and analytics are generated instantly
Outcome:

Complete asset visibility at all times.

Asset Tagging Process

BUSINESS

A teal-colored hexagonal graphic that serves as a background for the text. At the top center of the hexagon is a white icon of a star inside a circle, with a ribbon-like shape below it. Below the icon, the words "Case Studies" are written in a white, sans-serif font.

Case Studies

The Goldman Sachs logo is displayed in white serif font on a blue rectangular background. The background of the entire image is a photograph of a modern glass skyscraper in Bangalore, India, with a large stone fountain in the foreground. The sky is clear and blue.
